You control your car—LEFT and RIGHT—using the "FIRE" button to start the game and accelerate on the tracks.

The car has a damage bar; the more it crashes into another vehicle, the more the bar depletes. If it reaches zero, you lose the race and your life, as the car catches fire and explodes.

A variety of cars and trucks appear and race across the track from left to right.

Game Objective

The player controls a fast sports car and must race through approximately 18 tracks—set in locations such as racetracks, beaches, and mountains—while competing against a large number of other high-speed sports cars; overtake them all and cross the finish line as the winner.

Circuits

The first circuit takes place in farm fields, where players must get used to the challenges they will face on later tracks; the cars are fast—appearing in groups of one or two—and move from left to right, but the difficulty level is not very high.

On the second beach circuit, the difficulty level rises a bit more; the number of cars has doubled from two to four, which can make overtaking tricky, so be very careful and try to find a strategy to get past them.

On the third mountain circuit, the difficulty ramps up significantly; the trucks come charging right at you, so you need to be careful. Don't get nervous or panic, or you might deplete the damage bar and trigger a Game Over. The paths vary between one and two lanes.

Olioni Games Challenge

Olioni Games challenges players to complete the game; if they reach the "YOU WIN" screen, take a photo of it, and email it to the company address listed on our website, winners will receive a personalized printable poster, a ROM pack containing six games to play, and a modified version of the game featuring their name on the final screen.
