

# GOOD MORNING VIETNAM GAME MANUAL

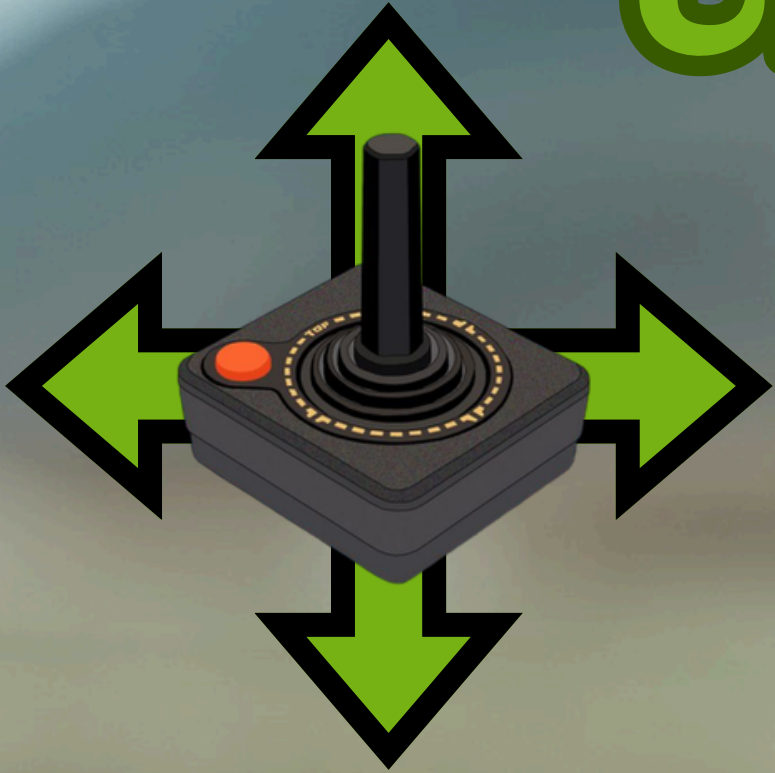

© 2026 OLIONI GAMES.  
PROGRAMMED BY XAN

**Good Morning Vietnam is compatible with your Atari 2600 console system.**

**All rights are reserved and belong to the programmer XAN. Any sale of copies for non-profit purposes to the developer Olioni Games is prohibited. The only authorized developers are BAH GAMES and 8 Bits Milli Games.**

## **GAME CONTROLS**

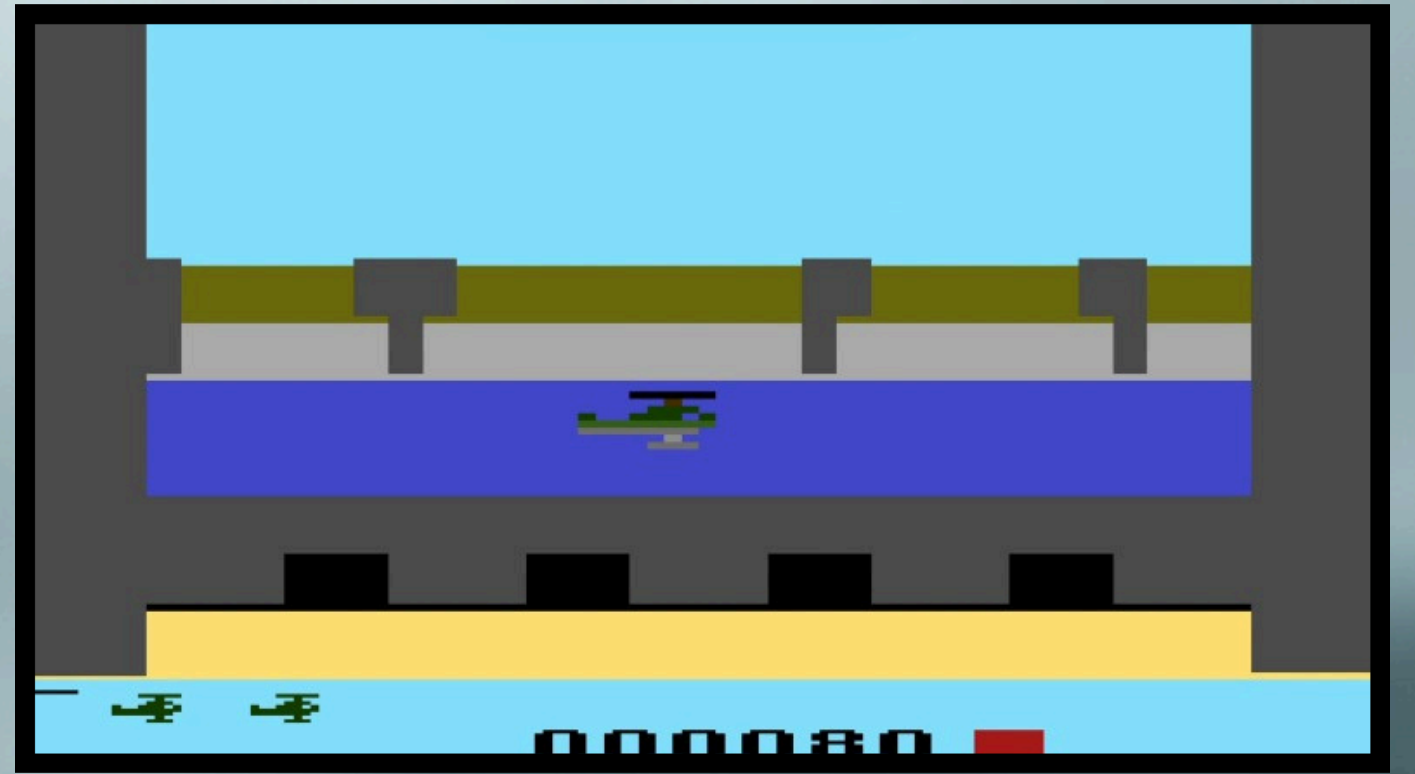

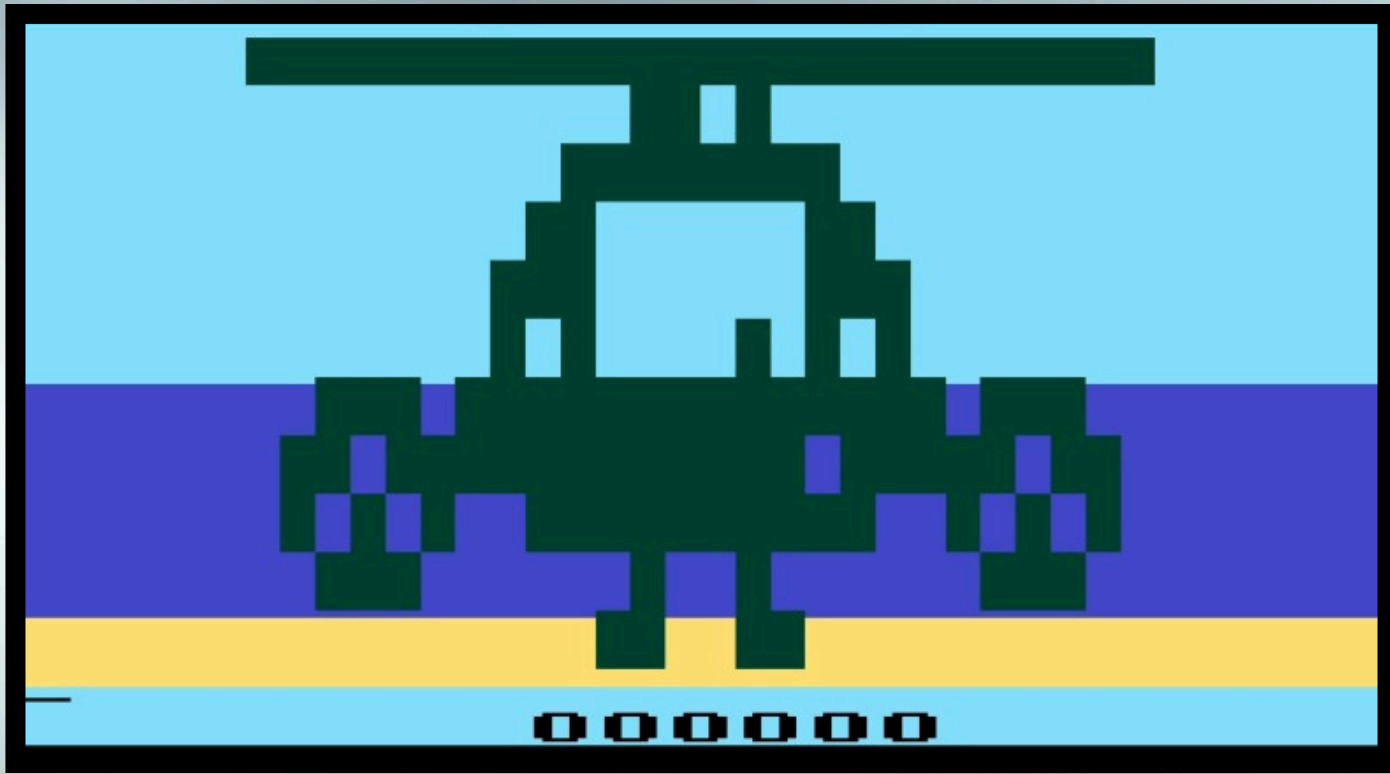

**Players pilot their war helicopter, as shown in the example to the side, using the "FIRE" button to start the game and fire missiles at the war tunnels.**

**If you hold down the "FIRE" button, it releases a tank-defeating bomb on difficult levels.**

**Be careful of the building's structure so you don't hit your helicopter and lose a life; watch out for the missiles from the tanks coming your way; stay below on the street to shoot them off and proceed to the next area.**

# GAME OBJECTIVE

Players control an American war helicopter tasked with rescuing American prisoners of war. However, the enemy, having learned via telegram that the rescue was underway, began opening fire on the rescue team. Therefore, you must engage in combat to continue your mission.

Be careful with the buildings so you don't get hit and destroy your aircraft; shoot the enemy. After defeating a number of tanks, the game progresses to other levels, making them more difficult.

# OLIONI GAMES CHALLENGE

**Olioni Games is back with its challenging games for players to win prizes. If players reach the end of the game or score 10,000 points, take a screenshot and send it to our website email, we will send you a free game, a personalized poster with your name, and you will become a member of our group on our website.**

## CREDITS

**Programmer: XAN**

**Designer: XAN**

**Distributor: Olioni Games**

**Mr. Xan is an incredibly creative programmer. Olioni Games has had the privilege of having him as part of our team. We've always given him exclusivity, opening the doors to new opportunities, and earned him enormous recognition in the Atari 2600 gaming market.**
