

SPIDER ATTACK

GAME MANUAL

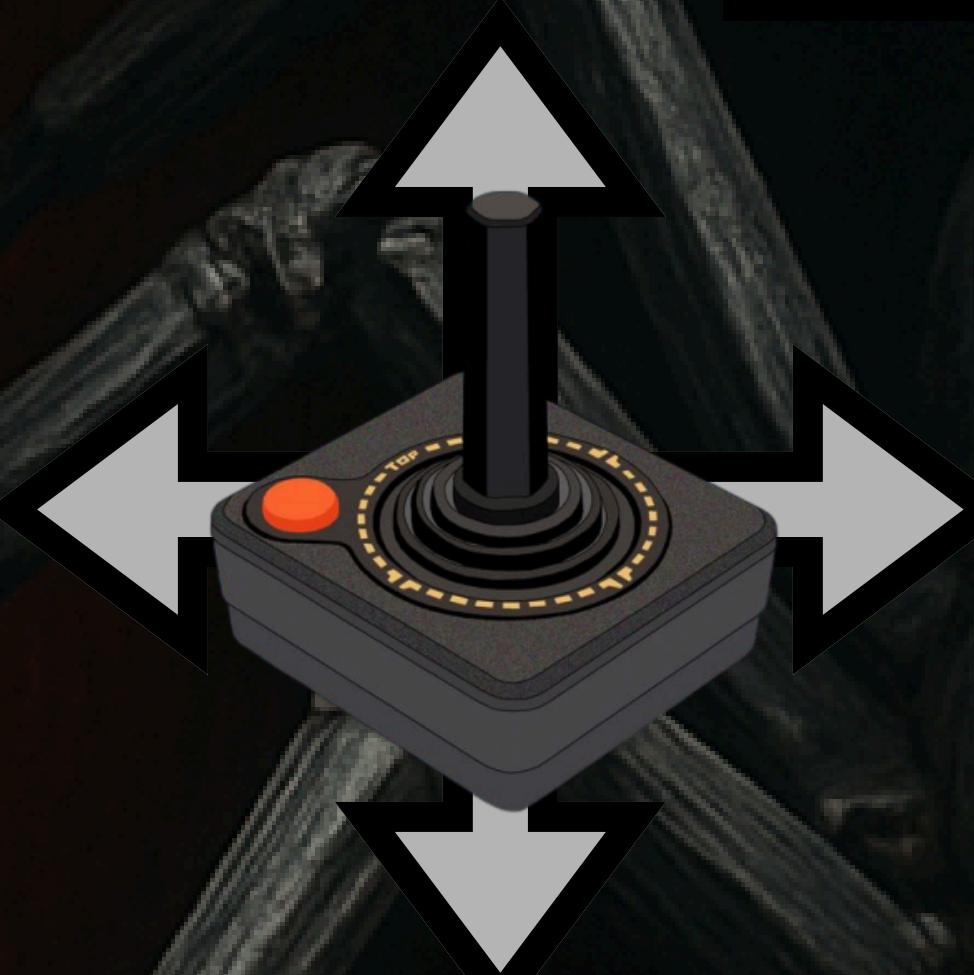

©2025 OLIONI GAMES
Programmed by XAN

**Spider Attack is compatible with your
Atari 2600 video game system, VCS.**

**All rights to this game belong to Mr. Xan
with distribution by Olioni Games for his
Atari 2600 fans.**

GAME CONTROLS

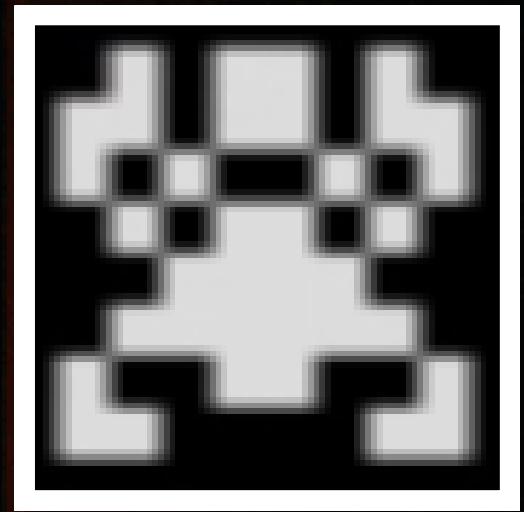

With your joystick, you control the gray metal spider, through the corridors of the metal walls, be careful when colliding with them, you ask for a life and damage your armor with impact.

With the action button you start both the game and shoot missiles at your enemy, your shot goes through walls, and can help you hit your enemy.

The stage moves both horizontally and vertically, with small parts that you can pass, but nothing that gets in the way, you need to adapt and be able to complete the stages.

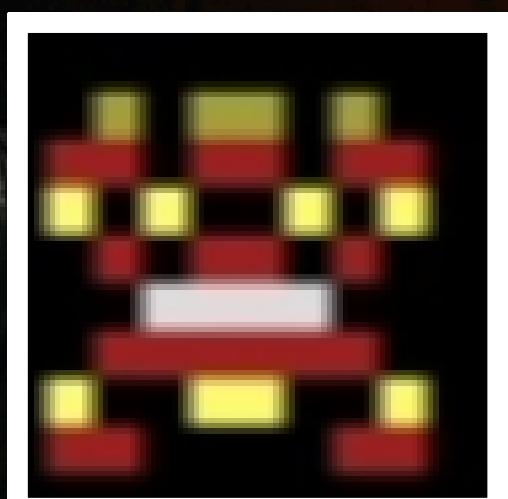

GAME INFORMATION

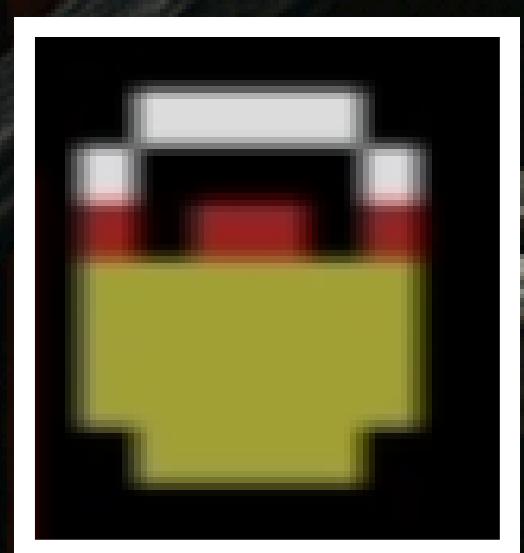

Metal Spider, you control the metal spider, it has a missile, which can destroy your enemy, but it has limited energy, which decreases as the phase progresses.

Titanium Spider, it wanders around the stage, sometimes it moves, so be careful, you can attack it, but be careful when colliding with it.

Score = 100

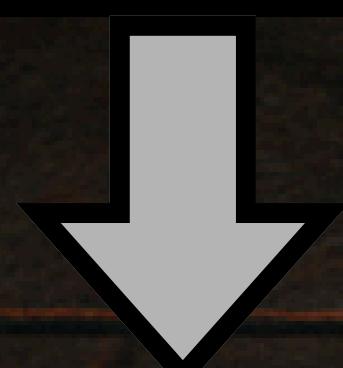

Energy fluid, which increases the player's bar and prevents him from losing energy and losing a life, but as the levels progress, the fluid does not appear much, making things a bit more difficult.

Score = 40

Spider's Present Lives

Decreasing Energy Bar

OBJECTIVE OF THE GAME

Guide yourself through these corridors, trying to escape this deadly trap. Your journey will not be easy, so be careful with some walls that move and close you in, while worrying about surviving and attacking another romantic spider, and worrying even more about your energy bar, which will run out along the way.
